

BACK-TO-SCHOOL WATER SAFETY

NEWSLETTER

Attention Parents & Caregivers! Water safety is not just a concern for the summer months but a year-round responsibility. With drowning ranking as the single leading cause of accidental death in children ages 1-4, we are doing our part to educate students and parents on the importance of water safety.

Drowning is fast and silent, but it is preventable!

Please use and share these FREE seasonal resources to help keep water safety top of mind in your home!
