

SUMMER BREAK WATER SAFETY

NEWSLETTER

Attention Parents & Caregivers! With school letting out for summer soon, we must remember that water safety is especially important during the Summer months. With drowning ranking as the single leading cause of accidental death in children ages 1-4, we are doing our part to educate students and parents on the importance of water safety, especially as pools and beaches become more inviting. **Drowning is fast and silent, but it is preventable!**

Please use and share these FREE resources this summer to help keep water safety top of mind for your family!

Find The Right Swim Program
For Your Child This Summer
